Simple Assistant AI Plugin Guide

Introduction

Welcome to the Simple Assistant AI plugin! This plugin integrates an AI assistant into your WordPress site, allowing you to handle basic tasks and provide AI-powered responses to user queries. Follow this guide to install, configure, and use the plugin effectively.

Installation

1. Download the Plugin:

   - Download the plugin ZIP file from the provided link: Download Simple Assistant AI (https://freefuture.eu/download/sample-plugin-ai.zip).

2. Upload the Plugin:

   - Log in to your WordPress admin dashboard.

   - Go to Plugins > Add New.

   - Click the Upload Plugin button at the top of the page.

   - Select the downloaded ZIP file and click Install Now.

3. Activate the Plugin:

   - After installation, click the Activate Plugin button to activate the plugin on your site.

Configuration

1. Accessing the Settings:

   - Navigate to Assistant AI in the WordPress admin menu.

   - This will take you to the plugin's settings page.

2. Assistant Name:

   - You can give your AI assistant a name by entering it in the Assistant Name field. This name will be displayed in the chat interface.

3. Custom Rules:

   - In the Assistant Rules field, you can define specific rules for the AI to follow when generating responses. These rules will be applied internally and won't be visible to end users.

4. Saving Settings:

  - After entering your desired settings, click the Save Changes button to apply them.

 Shortcode Usage

1. Adding the AI to Your Site:

  - To display the AI assistant on your site, use the shortcode `[simple_assistant_ai]`.

  - You can place this shortcode in any post, page, or widget where you want the AI assistant to appear.

2. Compatibility:

  - The shortcode works seamlessly with any WordPress page builder, allowing you to position the assistant wherever you need it.

 Daily Usage Limits

- Trial Version:

  - This plugin is currently in a trial version, allowing users to submit up to 10 queries per day.

  - If a user exceeds this limit, the plugin will notify them that they've reached the daily limit and suggest upgrading to the full version.

 AI Responses

- The AI generates responses based on user input and the rules you've defined in the settings.

- The AI responses are powered by the OpenAI GPT-4 model, ensuring high-quality and relevant answers.

 Security

- Encrypted API Key:

  - The plugin uses an XOR encryption method to secure your OpenAI API key. This ensures that your API key is stored securely and is only decrypted when making requests to the OpenAI API.

Upgrading to the Full Version

- for full control and unlimited usage, you can upgrade to the full version of the plugin.

- Visit FREE FUTURE LDA (https://www.freefuture.eu) for more information and pricing details.

 Support

- Documentation and Examples:

  - You can access detailed documentation and examples by visiting DOCS and SAMPLE (https://freefuture.eu/documentazione/).

- Technical Support:

  - If you encounter any issues or have questions about the plugin, please contact our support team at FREE FUTURE LDA (https://www.freefuture.eu/section-5).

Thank you for using Simple Assistant AI! We hope this plugin enhances your website's functionality and provides valuable assistance to your users.
